### Business Protection for Demanding Users

SEP's Hybrid Backup solution SEP sesam is especially well-suited for heterogeneous IT-infrastructures of any size. SEP sesam protects absolutely reliable any company data and supports all virtualization platforms, operating systems, databases and applications – up to SAP.

Visit [www.sep.de/sap](http://www.sep.de/sap) for further information about the protection of SAP B1, including **Whitepaper** and **Video Tutorials!**

### SEP sesam provides Business Continuity

SAP solutions are the centerpiece in IT-environments of companies and organisations worldwide. SAP systems manage all information, from sales to customer relationships, finance and business operations.

The importance of these systems requires a comprehensive business continuity management, focusing on the tolerated Recovery Point Objectives (RPO) and Recovery Time Objectives (RTO) in case of a disaster.

And that's where SEP's unified data protection comes in. The SAP certified Hybrid Backup and Bare Metal Recovery Solution avoids any data loss and recovers the whole SAP environment after a disaster scenario like:

- Force majeure
- Hardware failures
- Human errors
- Data corruption
- Logical and software errors

With SEP sesam, data is protected 24/7 and is always available. SEP's reliable backup solution offers numerous certifications for SAP environments and has been SAP Certified since 2002. It is the only backup solution which protects SAP ASE (Sybase) and is certified for SAP HANA 1 & 2 on Intel- and IBM Power platforms as well as SAP NetWeaver installations. SEP's versatile and economical data protection is ideal for both medium and large enterprises.
